

## How CRP'S and Parents Can Support Nonspeaking Advocates

Be patient while we spell. It takes time to spell or type one letter at a time.

Help us stay regulated in meetings. It can be tough during long ones.

Let us prepare in advance when possible. The extra time makes a difference.

Assist with getting our thoughts onto documents. Motor coordination can be challenging.

Type our words as we spell them into the chat. We want to be represented accurately.

Be a positive influence and encourage our efforts. We truly appreciate all you do to support us!
