SPELLER 7-14 day follow-up email template to recipients of handout, 9.2024

Dear <Healthcare Professional name>,

I hope you have had a chance to read the informational brochure and cover letter I <sent/gave> you about nonspeakers' needs for communication access and self-regulation support. My goal in sharing it is to give you new knowledge and to enhance your interactions with your nonspeaking patients. If you have not had a chance to read it, please take a look at the attached/uploaded copies. ***Remember to also send/attach/upload copies of the handout and your prior cover letter.***

I am requesting that you help me and the Spellers and Allies Advocacy Network, the self-advocacy group that I support/am a member of. They are working to educate healthcare professionals about nonspeakers' abilities and to dispel some pervasive misconceptions about us.

We want to get your feedback on the informational handout. In addition, I'd greatly appreciate your help by connecting this group of self advocates to other healthcare professionals so that they can educate additional people. They are especially interested in being connected to people who organize conferences and continuing education as well as thought leaders such as department heads, division chiefs, program directors and researchers. They want to give presentations to groups of healthcare professionals and discuss other areas of collaboration.

Thanks so much if you have already completed the brief online feedback questionnaire. If you have not done so yet, use the QR code or link to complete the 6 item questionnaire to give us feedback and also let us know if you can connect us to other healthcare professionals.

Thank you again for your interest and support.

Sincerely,

<your name>
